ANNIVERSARY

A ROOM WITHOUT WALLS TEACHING ARTISTRY EXHIBITION

Snow City Arts has been providing arts education and creative inspiration to youth in Chicagoland hospitals for 20 years! Come celebrate our 20th anniversary at our A Room Without Walls series of special pop up events around Chicago. Each event will represent the disciplines in which Snow City Arts works: Creative Writing, Visual Arts, Teaching Artistry, Theater, Film, and Music. Because Snow City Arts works in a private setting at the bedside of our student's hospital beds, an outside look into their stories and work is rare. These events offer you the unique

opportunity to get to know Snow City Arts, our students, and our Teaching Artists.

WEST CANCER CENTER

Located in the Southeastern United States and serving more than 35,000 individuals each year, West Cancer Center is the region's comprehensive leader in adult cancer care and research. Our mission is to provide the highest quality cancer care and clinical research throughout our patients' cancer journey, while respecting their quality of life – physically, emotionally and spiritually.

Our vision is to continually innovate, research and educate in order to advance the highest quality, compassionate, patient-centered and personalized cancer care. West Cancer Center believes the atmosphere and environment our patients receive care and treatment can be as vital in their journey as their clinical treatment. As a result, we have designed many of our locations with an arts focus.

For example, the conscious design and custom art collection at our East Campus was mindfully created and curated to help soothe, heal, and uplift each time someone walks through our doors.

Likewise, we often invite artists and musicians from throughout the community to energize and support our patients, families, and staff through the arts. Creative and healing arts continue to be at the forefront of our priorities as we expand our services through the West Cancer Center's Integrative Oncology Program.

Our primary goal is to holistically impact the lives of individuals through creative, inspiring, and innovative offerings. An array of individual and group experiences, dedicated exhibit space, evaluation and research guide our arts in health initiatives. Art therapy is among the full line of integrative services that will be offered to assist our West Cancer Center community discover strengths, instill hope, and channel courage.
